

City Planning of Kishiwada

A city and people shining with vibrancy and vitality, Kishiwada

●Kishiwada Master Plan volume III

Basic idea

"Respect for human beings and the conservation of environment"

We realize an affluent, healthy and cultural life in Kishiwada by assuring our people of respects for human rights and peace. At the same time, we put our first consideration on humane life in the city planning, and reconsider the material or economy-centred society of yesterday.

We treasure the gift from nature forever and design our city as an eco-friendly city. The blessing from the sea and the mountains will give us peaceful life.

Our Future Vision

Blessed with the beautiful nature from the "Chinu-no-umi" of Osaka bay to the beech woods on Izumi-Katsuragi mountains, Kishiwada City keeps on growing up to a vital city upon the rich history and tradition.

We aim to build up this city more energetic and individual up to 2010, on close co-operation with our people, and by cherishing the nature, the history and our own culture.

●Our goal of the master plan

Here are the five targets to be achieved for the city planning.

- I A city respecting for human rights and keeping educational and cultural standard high.
- II A city people living together with efficient service for health and welfare.
- III An eco-friendly city nourishing the Earth and people.
- IV An attractive city in safe and comfortable environment.
- V A vital city with vigorous Industrial promotion.
